.

PROFESSIONAL SUMMARY & OBJECTIVE:

With nearly 10 + years of hands-on experience in Data Analysis, AWS Cloud Solutions, and Software Engineering, I excel in automating, analyzing, visualizing, and reporting diverse data across projects of varying scales. I have a proven ability to deliver actionable insights and foster data-driven decision-making. Eager to leverage my expertise for the success of forward-thinking organizations.

SKILLS:

- Data Analysis
- PySpark
- PostgreSQL
- AWS Cloud
- Python,SQL
- Bitbucket
- Git, GitHub
- Linux, Shell
- CloudWatch
- CI/CD
- Flask
- Django
- Pandas
- Tableau
- Power BI
- REST APIs
- API Gateway
- EC2, IAM, S3
- Lambda
- Redshift
- RDS
- ETL, Jira
- AWS Glue
- Event Bridge
- AWS Athena, EMR, EKS
- Postman
- Step Function
- Agile, Scrum
- Debugging & RCA
- AI Tools
- Databrick
- Terraform

PROFESSIONAL EXPERIENCE:

Genpact, Bengaluru | **Senior Data Engineer** | June 2024 – Present
- Genpact is a Leader in digital transformation and outsourcing. *Client:* ***GE Vernova***

- Designed and implemented data pipelines using PostgreSQL and Apache Airflow to ensure seamless orchestration and integration of data from various sources, enhancing data availability and performance for GE Vernova.
- Led the migration of ETL processes from Talend and Informatica to Enterprise Data Lake (EDL), optimizing data processing workflows and improving scalability and efficiency in the data engineering infrastructure.
- Collaborated with cross-functional teams to optimize data architecture and implement advanced analytics solutions, driving data-driven decision-making and supporting business goals for GE Vernova.
- Optimized SQL queries to enhance performance and reduce processing time, ensuring timely delivery of critical business insights while maintaining high data quality.
- Automated cloud data infrastructure using Terraform, provisioning and managing multiple AWS resources to enable standardized, scalable, and secure data engineering environments.
- Led end-to-end development of production-grade ETL/ELT pipelines using Databricks, PySpark, and AWS services, improving scalability, reliability, and cost efficiency.
- Partnered with product, analytics, and business teams to understand data needs and deliver scalable solutions aligned with business goals.

Kwalee, Bengaluru | **Software Engineer - Reporting** | May 2023 – April 2024
- Kwalee is a UK based app development company spanning across globe. *Projects: **In-house** products*

- Collaborated with the Reporting Team, leveraging Python, SQL, and PostgreSQL to develop new tools, improving reporting efficiency by 25%.
- Enabled Tableau Dashboard Executives to make more informed decisions by integrating AWS services like AWS GLUE and PySpark for data analysis, resulting in a 30% increase in data-driven decision-making accuracy.
- Maintained and upgraded internal tools using Bitbucket and Git, leveraging AWS Cloud services like EC2 and IAM, reducing data management time by 20% and enhancing efficiency.
- Generated ad-hoc data sets, facilitated by Python, SQL, and PostgreSQL, leveraging AWS services such as S3, Redshift, and RDS, resulting in a 40% increase in strategic decision-making processes.
- Conducted data cleaning and validation using Python, Pandas, and SQL, leveraging AWS Glue for ETL processes, achieving a 98% data integrity rate and supporting reliable insights.
- Established connections to Restful APIs, utilizing Python, Flask, and AWS API Gateway for data processing, contributing to a 25% improvement in data processing efficiency.
- Implemented monitoring and alerting systems using AWS CloudWatch, ensuring proactive issue detection and resolution, reducing downtime by 15%.
- Contributed to CI/CD processes, utilizing AWS Lambda and Step Functions for automated deployments, improving deployment frequency by 20%.

Vaco Binary Semantics LLP, Gurugram | **Sr. Analyst** | Sep 2016 – May 2023
- Vaco: Global leader, serving Fortune 500 clients across industries. *Client: **Google***

- Enhanced internal tools with Python and Git, boosting operational efficiency by 20% and seamlessly integrating with RESTful APIs.
- Optimized data processes for YouTube Ads with Python and SQL, producing tailored ad-hoc datasets and enhancing decision-making accuracy by 35%.
- Provided investigative support using Python, SQL, and PostgreSQL for data analysis, ensuring a 95% data accuracy rate and facilitating strategic insights.
- Maintained data integrity through meticulous cleaning and validation processes, achieving a 98% accuracy rate with Pandas library and PostgreSQL.
- Developed comprehensive dashboards with Tableau and Looker to meet diverse organizational needs, enhancing data accessibility by 40% and driving strategic decision-making for Google NESTcam.
- Enhanced optional efficiency by 20% through the implementation of cloud-based solutions on AWS, including EC2, S3, Glue and Lambda. Automated data processing workflows using AWS Glue and Lambda, resulting in a 35% improvement in decision-making accuracy and scalability across various data sources.

CERTIFICATIONS:

- ✓ AWS Certified Cloud Practitioner.
- ✓ Getting Started with Python by Coursera.
- ✓ NCC Grade A Certificate.
- ✓ Completed Genome BITS Wave for GEN AI

EDUCATION:

- B.Tech (Honors) in Mechanical Engineering from Uttar Pradesh Technical University [now A.K.T.U.], Lucknow, U.P. (2012-2016): **74.50%**
- XII from D.A.V. Public School, Hehal, Ranchi, Jharkhand (CBSE 2012): **75.40%**
- X from D.A.V. Public School, Hehal, Ranchi, Jharkhand (CBSE 2010): **89.30%**
